The Calvert County Planning Commission is coordinating the update to the Lusby Town Center Master Plan, adopted in 2002. The Planning Commission will be hosting a two-day design workshop (charrette) that will provide citizens and business owners the opportunity to share their vision of what they would like the Village Green to be in the future. This interactive design workshop will include the development of design alternatives, culminating in one conceptual template, compiled from input from citizens participating in this process. This template will help guide Village Green improvements and development as the County goes forward with implementation. Light refreshments will be served. Please invite your neighbors.
